This report is issued on the understanding that Management has drawn my attention to all the matters, which they are aware of concerning the financial position of the Companies and any other matter, which may have an impact on my opinion, on the fair value of the shares of the Companies including any significant changes that have taken place or are likely to take place in the financial position of the Companies. Events and transactions occurring after the date of this report may affect the report and assumptions used in preparing it and I do not assume any obligation to update, revise or reaffirm this report.

6. VALUATION APPROACH AND METHODOLOGIES

- 6.1. For the purpose of valuation, generally following approaches can be considered, viz,
- (a) the 'Market' approach;
 - (b) the 'Income' approach; and
 - (c) the 'Cost' approach
- 6.2. The 'Cost' approach represents the value with reference to historical cost of assets owned by the company and the attached liabilities. Such value generally represents the support value in case of profit-making business and thus, has limited relevance in the valuation of

the business of a going concern.

In the present case, the business of the Companies are intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the Cost approach is not adopted for the present valuation exercise.

6.3. Considering the above, I have thought fit to consider 'Market' approach and 'Income' approach for valuation of equity shares of PCL and RPL.

6.4. **MARKET APPROACH**

6.4.1. Under the Market approach, since the equity shares of the Companies are not listed on any stock exchanges, we have thought fit to consider Comparable Companies Multiple ('CCM') method for valuation of equity shares of PCL and RPL under the Market approach.

6.4.2. **COMPARABLE COMPANIES MULTIPLE METHOD**

Under CCM method, the value of equity shares of the Companies are determined by using multiples derived from valuations of comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully. In the present case, Enterprise Value (EV) to Earnings before Interest Tax Depreciation and Amortization (EBITDA) multiples of comparable listed companies are used to arrive at EV of the Companies.

To the value so arrived, appropriate adjustments have been made for net cash and cash equivalents and value of investments after considering the tax impact wherever applicable, to arrive at the adjusted earnings value.

The adjusted earnings value as arrived above is divided by the outstanding number of equity shares to arrive at the value per share.

6.5. **INCOME APPROACH**

6.5.1. Under the 'Income' approach, equity shares of PCL and RPL have been valued using 'Discounted Cash Flow' (DCF) method.

6.5.2. Under the DCF method the projected free cash flows from business operations after considering fund requirements for projected capital expenditure and incremental working capital are discounted at the Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

6.5.3. WACC is considered as the most appropriate discount rate in the DCF Method, since it

reflects both the business and the financial risk. In other words, WACC is the weighted average of the company's cost of equity and debt. Considering that the Companies do not have any debt, nor intend to borrow any debt in future, cost of equity has been considered as the WACC for discounting the Free Cash Flows of the Companies.

- 6.5.4. To the value so arrived, appropriate adjustment has been made for net cash and cash equivalents and value of investments, after considering the tax impact wherever applicable, to arrive at the equity value.
- 6.5.5. The value as arrived above is divided by the outstanding number of equity shares to arrive at the value per share.

7. RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

- 7.1. The fair basis of amalgamation of PCL with RPL would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. Though different values have been arrived at under different methods, for the purposes of recommending a ratio of exchange it is necessary to arrive at a single value for the shares of the Companies. It is however important to note that in doing so, I am not attempting to arrive at the absolute values of the shares of each company. My exercise is to work out relative value of shares of the Companies to facilitate the determination of a ratio of exchange. For this purpose, it is necessary to give appropriate weightage to the values arrived at under each approach.
- 7.2. To arrive at the relative values of PCL and RPL, I have considered average of values arrived based on CCM method under 'Market' approach and DCF Method under Income approach.
- 7.3. The fair equity share exchange ratio has been arrived on the basis of a relative valuation of equity shares of PCL and RPL based on the approaches explained herein earlier and various qualitative factors relevant to the companies and the business dynamics and growth potential of the businesses, having regard to information base, management representation and perceptions, key underlying assumptions and limitations.
- 7.4. In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgement taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but

which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

'If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible.'

- 7.5. In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove earlier in this report, in my opinion, a fair equity share exchange ratio for the proposed amalgamation of PCL with RPL is as under:
- 5 (Five) equity shares of RPL of INR 10 each fully paid up for every 3 (Three) equity shares of PCL of INR 10 each fully paid up**

Thanking you,

Yours faithfully,

S. A. Shah
